

Full line of Centricut brand stainless steel consumables now available for owners of Kjellberg HiFocus systems

HANOVER, NH—July 19, 2011—Hypertherm, a U.S. based manufacturer of advanced metal cutting systems, is announcing the launch of Centricut brand consumables for businesses that use a PerCut 370.2 torch on a Kjellberg HiFocus 280i, 360i, or 440i system.

The new consumables are designed for high amperage stainless steel cutting. They perform equal to, and in some cases better than, OEM consumables. However, they enable customers to lower their operating costs without sacrificing cut quality or productivity.

Today's announcement follows the release last winter of stainless steel consumables for companies using the PerCut 370.1 torch. It means users who cut metal using any Kjellberg HiFocus system now have a complete line of consumables for stainless steel cutting.

"We are committed to providing unparalleled value and performance to customers who cut metal, no matter what type of system they own or use," said Martin Geheran, product marketing manager for Hypertherm's Centricut brand. "Today's announcement further demonstrates this commitment and enables us to help many more users lower their overall metal cutting costs."

The new consumables are precision manufactured to Hypertherm's tight tolerances so customers get consistent, reliable performance from their cutting system. Businesses interested in trying any of the Centricut brand products can contact Hypertherm at 800-753-7623 or their authorized Hypertherm distributor.

Hypertherm's Centricut brand engineers and manufactures advanced plasma and laser cutting consumables. Its product line includes consumables that deliver increased value to people who own most any non-Hypertherm cutting system including systems by ESAB, Kjellberg, and Trumpf. All Centricut brand products are engineered and manufactured to exacting standards and incorporate the latest technological advances that help to reduce operating costs, while delivering increased cut speed and quality. Centricut products include free technical support and come with same-day shipping.
