

Cut with confidence™

Hypertherm expands offerings for Kjellberg HiFocus plasma systems with new consumables for stainless steel cutting

HANOVER, N.H.—Jan. 20, 2011—Hypertherm today announced the availability of new consumables for Kjellberg HiFocus plasma cutting systems. The offerings from Hypertherm's Centricut brand include the full line of consumables needed for stainless steel cutting. The consumables are compatible with Kjellberg's HiFocus 100, HiFocus 130, and HiFocus 160i systems and PerCut 101, PerCut 160, PerCut 170 and PerCut 370.1 torches.

"With a full line of stainless consumables that perform equal to or better than the OEM, Hypertherm continues to demonstrate its global technological leadership in plasma cutting," said Martin Geheran, product marketing manager for Hypertherm's Centricut brand. "Customers will lower their operating costs without sacrificing cut quality or productivity."

In addition, when used on the HiFocus 130/160i systems, owners and operators will see a significant increase in consumable life when using the Centricut consumables. Hypertherm testing shows a 33 percent increase in consumable life versus OEM consumables for the same system with an ISO cut quality range equal to or less than four.

Like all Hypertherm consumables, the Centricut offerings are manufactured to tight tolerances so customers get consistent, reliable performance from their cutting system. Businesses interested in trying any of the Centricut products can contact Hypertherm at 800-753-7623 or their authorized Hypertherm distributor.

Hypertherm's Centricut brand engineers and manufactures advanced plasma and laser cutting consumables. Its product line includes consumables that deliver increased value to people who own most any non-Hypertherm cutting system including systems by ESAB, Kjellberg, and Trumpf. All Centricut brand products are engineered and manufactured to exacting standards and incorporate the latest technological advances that help to reduce operating costs, while delivering increased cut speed and quality. Centricut products include free technical support and come with same-day shipping.
