

Centricut brand high amperage stainless steel consumables now available for owners of select Kjellberg systems

Roosendaal, The Netherlands —January 16, 2012—Hypertherm, a manufacturer of advanced metal cutting systems, is pleased to announce the launch of an expanded line of Centricut brand consumables for Kjellberg systems.

The new consumables are designed for high amperage stainless steel cutting using Kjellberg's FineFocus 800, FineFocus 800 Plus, FineFocus 900, PA-S70, or PA-S75 systems. They include features that eliminate leaking compared to the OEM version and better cooling technology in the form of Hypertherm's patented CoolFlow nozzle. This guarantees longer consumable life, enabling customers to lower their operating costs without sacrificing cut quality or productivity.

"We think Kjellberg owners who use these consumables will be very pleased with the performance they see and the money they save," said Martin Geheran, product marketing manager for Hypertherm's Centricut brand.

The new consumables are precision manufactured to Hypertherm's tight tolerances so customers get consistent, reliable performance from their cutting system. Businesses interested in a free trial of any Centricut brand product can contact Hypertherm at 0031 165 596939 or their authorized Hypertherm distributor.

Hypertherm's Centricut brand engineers and manufactures advanced plasma and laser cutting consumables. Its product line includes consumables that deliver increased value to people who own most any non-Hypertherm cutting system including systems by ESAB, Kjellberg, and Trumpf. All Centricut brand products are engineered and manufactured to exacting standards and incorporate the latest technological advances that help to reduce operating costs, while delivering increased cut speed and quality. Centricut products include free technical support and come with same-day shipping.
