

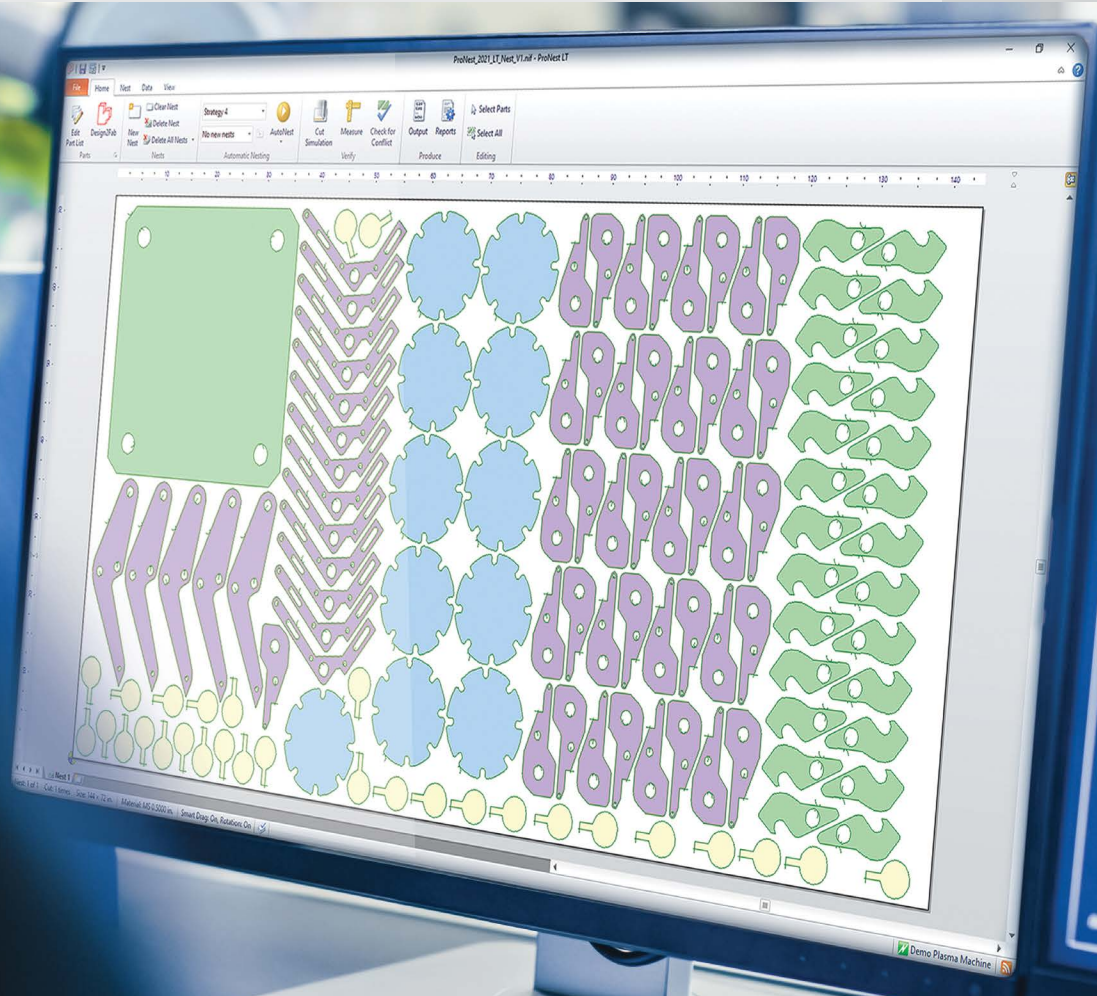

# Plate Inventory

ProNest<sup>®</sup> optional module

Enterprise modules

## Benefits:

- Accurate material planning
- Faster inventory turnover
- Increased material utilization

The Plate Inventory module provides a database to store, track, and utilize all available inventory. After completing a job, remnants or skeletons can be saved for later use. Plate inventory will be updated automatically as the plate is consumed and the new remnant is created.

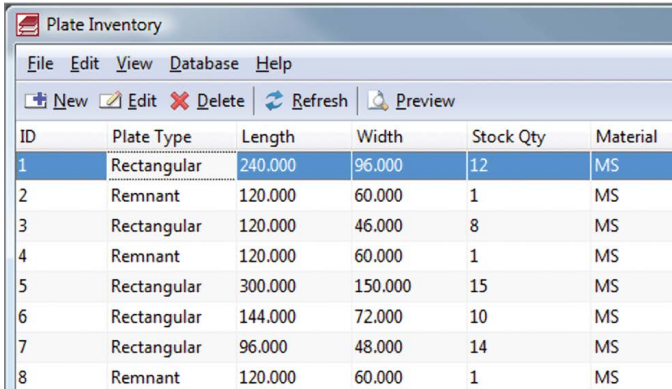

## Here is what people are saying about Plate Inventory:

“Before ProNest, plate inventory was an issue. We had a large volume of remnants, and reconciling inventories was impossible. Now, with ProNest and its Plate Inventory module, we are consuming more remnants from the floor and we’ve reduced our raw material inventory by half. Management is happier because cash tied up in plates has been reduced without sacrificing delivery.”

– Colden Wetmore, Craig Manufacturing

## How it works

The Plate Inventory module stores all plate information in a database. It keeps track of the material, size, and quantity of each plate. Having digital access to the plate list allows the operator to choose the most appropriate plate for the job.

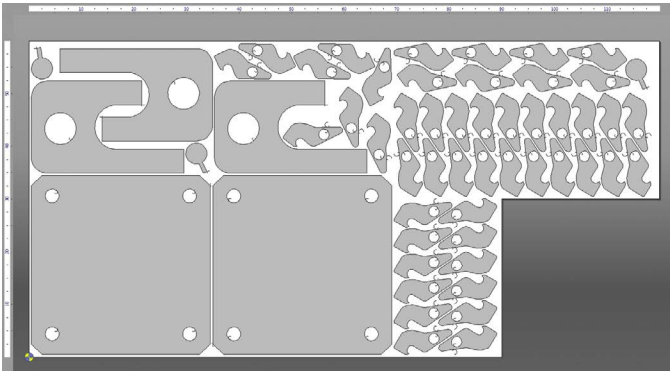

ID	Plate Type	Length	Width	Stock Qty	Material
1	Rectangular	240.000	96.000	12	MS
2	Remnant	120.000	60.000	1	MS
3	Rectangular	120.000	46.000	8	MS
4	Remnant	120.000	60.000	1	MS
5	Rectangular	300.000	150.000	15	MS
6	Rectangular	144.000	72.000	10	MS
7	Rectangular	96.000	48.000	14	MS
8	Remnant	120.000	60.000	1	MS

## Data Sync (optional)

Data Sync allows users to automatically exchange plate inventory information between ProNest and your ERP/MRP/MES software. Please see the Data Sync brochure, or visit [www.hypertherm.com/CAM](http://www.hypertherm.com/CAM) for more information.

Consider including other Enterprise modules to further improve your operation:

- Data Sync
- Work Order Processing
- Production Manager
