## **Hypertherm announces new line-up of free educational webinars covering plasma, laser, waterjet, CAM software and more**

**HANOVER, NH—Jan. 28, 2013**—Hypertherm, a U.S. based manufacturer of plasma, laser, and waterjet cutting systems, is announcing its 2014 Webinar Series, a collection of free, educational webinars for fabricators and others who have the need to routinely cut metal and other industrial materials.

This year's webinar line-up features a number of experts covering a range of industrial cutting topics. They include webinars on optimizing CAM nesting software for increased performance; working with waterjet technology; gouging, beveling, and more. In addition, Hypertherm will offer webinars on cutting tube, pipe and stainless steel; and a comparison webinar that looks at how different cutting technologies stack up against one another.

The Hypertherm 2014 Webinar Series is open to anyone. Registration is fast and easy. Go to <http://response.hypertherm.com/CurrentWebinars>, select the webinar you'd like to register for, and then enter in your name and email address.

"Whether plasma, laser, or waterjet, Hypertherm's sole focus on cutting for its nearly 50 year history enables us to provide our customers with the information they need to confidently decide how to best address their cutting needs," said Reese Madden, director of North American marketing for Hypertherm. "Our 2014 webinar series, when combined with in-market live training events, and online training through the Hypertherm Cutting Institute, is one way we are working to support and advise our customers."

In addition to the live webinars featured as part of the 2014 Webinar Series, Hypertherm also offers a number of on-demand webinars and other training and educational materials on its website at [www.hypertherm.com](http://www.hypertherm.com). All of these educational resources are offered at no cost.

Hypertherm designs and manufactures advanced cutting products for use in a variety of industries such as shipbuilding, manufacturing, and automotive repair. Its product line includes handheld and mechanized plasma systems and consumables, as well as fiber laser and waterjet products, in addition to CNC motion and height controls and CAM cutting software. Hypertherm systems are trusted for performance and reliability that result in increased productivity and profitability for hundreds of thousands of businesses. The New Hampshire based company's reputation for cutting innovation dates back more than 40 years, to 1968, with Hypertherm's invention of water injection plasma cutting. The associate owned company, consistently named one of the best places to work in America, has more than 1,300 associates along with operations and partner representation worldwide.
