

WARNING!

Failure to follow operating instructions could result in personal injury or damage to equipment.

Radio Frequency Warning Manual

809450 Revision 1 – June 2019

English

Radio Frequency Warning

Wireless devices are certified for use in specific countries because they use radio frequencies that are regulated. These regulations differ from country to country. Certificates of Radio Frequency (RF) Compliance from wireless device manufacturers for wireless devices integrated into Hypertherm products can be found at www.hypertherm.com/docs.

The user of Hypertherm products that have integrated wireless devices is responsible for ensuring that each wireless device has been certified for the country of use and configured with the correct selection of frequency and channel for the country of use. Wireless devices that are integrated into Hypertherm products are not allowed to be operated in countries where regulations for wireless device certification have not been satisfied. Any wireless device or antennae modification or deviation from the permissible configuration, markings, power, frequency settings, and other local regulations on radio frequency wireless device for the country of use can be an infringement of national law.
