

# Why buy Hypertherm?

## American built and Associate owned

Hypertherm's Associate owners proudly build all of our systems in the United States. We are the only major manufacturer to do so.

## More than 50 years of cutting excellence

Our primary focus is designing and manufacturing the world's best industrial cutting equipment.

## Reliable and durable

Reliability and durability are designed into every system we build thanks to features like our patented SpringStart™ technology which eliminates moving parts in the torch for more reliable arc-starting.

## More torch styles

With 13 different Powermax® torch styles, including the world's only 15-degree and 4 and 6 foot Long torches, it's easy to find the right tool for the job.

## More consumables

Hypertherm-only consumable offerings like our patented FlushCut™, HyAccess™, and gouging consumables allow you to tackle any application that comes your way.

## Longer lasting consumables

Patented engineering inventions like Coaxial-assist™ jet, Conical Flow™, CoolCore®, CoolFlow™, and LongLife® plus precision machining to tolerances 8 times narrower than a human hair ensure Hypertherm consumables significantly outlast any other brand.

## Long-term support and training

All of our products come with a comprehensive support program – an all-access pass to everything you need to maximize the life of your cutting system and keep it cutting at its best.

## Large network of authorized retailers

Hypertherm systems are available at more than 3,000 welding supply stores around the world, ensuring wide support and availability no matter where you are.

## More on R&D

With close to 500 global patents, we dedicate more resources to industrial cutting research, development, and testing than any other manufacturer in the world.
