

# Counterfeit products put your business at serious risk

Always buy genuine Hypertherm products from authorized dealers

Burnt nozzle

Inconsistent electrode life

Burnt torch body

Poor quality cuts

Burnt shield

## Quality

Counterfeit products are inferior, inconsistent, unreliable, and illegal.

## Performance

Deviation from tolerances will likely impact overall performance resulting in poor or inconsistent cuts, reduced cutting speed, and significantly shorter consumable life.

## Safety

Counterfeit products may not be able to withstand the thermal demands of plasma cutting, may put equipment and, more importantly, may put operators at risk.

## Aftersales support

Using counterfeit parts will make troubleshooting difficult and may affect your warranty coverage.

## Overall operating costs

Poor quality cuts made with counterfeit products may require costly rework and valuable equipment could be irreparably damaged.

Counterfeit factory

Burnt torch leads

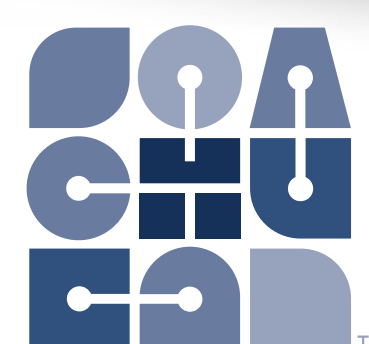

Costly rework

Inconsistent nozzle life
