*** Consulter « Information réglementaire » au www.hypertherm.com/docs pour obtenir les plus récents certificats de conformité aux radiofréquences (RF) pour les appareils sans fil intégrés aux produits Hypertherm.**	

Homologue par l'ARPCE

Les appareils sans fil utilisent des radiofréquences qui peuvent être réglementées, mais ces réglementations diffèrent d'un pays à un autre. Les appareils sans fil conformes aux normes IEEE 802.11a, 802.11b, 802.11g, 802.11n, 802.16e et autres sont conçus pour, ou certifiés pour être utilisés dans, certains pays. Les certificats de conformité relatifs aux radiofréquences (RF) délivrés par les fabricants d'appareils sans fil pour des appareils sans fil intégrés aux produits Hypertherm se trouvent dans la « Bibliothèque de documents » au www.hypertherm.com.

Les utilisateurs de produits Hypertherm possédant des appareils sans fil intégrés sont chargés de s'assurer que chaque appareil sans fil a été certifié pour le pays d'utilisation et configuré avec la bonne sélection de fréquence et le bon canal pour le pays d'utilisation. Les appareils sans fil intégrés dans les produits Hypertherm ne peuvent être utilisés dans des pays où les réglementations relatives à la certification des appareils sans fil ne sont pas remplies. Toute modification ou toute déviation aux configurations, marquages, puissance, réglages de fréquence et autres réglementations locales autorisées pour les appareils sans fil ou les antennes concernant la radiofréquence des appareils sans fil dans le pays d'utilisation peut être une violation de la législation nationale.

*** Consulte “Informações Regulatórias” em www.hypertherm.com/docs para obter os certificados mais recentes de Cumprimento de Radiofrequência (RF) para dispositivos sem fio integrados aos produtos da Hypertherm.**

⚠

Dispositivos sem fio usam radiofrequências que podem ser reguladas, mas os regulamentos variam de país para país. Os dispositivos sem fio que seguem os padrões IEEE 802.11a, 802.11b, 802.11g, 802.11n, 802.16e e outros são projetados para (ou certificados para uso em) determinados países. Os Certificados de Cumprimento de Radiofrequência (RF) dos fabricantes de dispositivos sem fio para dispositivos sem fio integrados aos produtos da Hypertherm podem ser encontrados na “Biblioteca de documentos” em www.hypertherm.com.

O usuário de produtos da Hypertherm que tenha dispositivos sem fio integrados é responsável por garantir que cada dispositivo sem fio seja certificado no país de uso e configurado com a seleção correta de frequência e canal para o país de uso. Os dispositivos sem fio que são integrados aos produtos da Hypertherm não podem ser operados em países onde os regulamentos de certificação de dispositivos sem fio não são cumpridos. Qualquer modificação nas antenas ou no dispositivo sem fio em relação à configuração permitida, modificação na marcação, potência, configurações de frequência e outros regulamentos locais referentes a dispositivos sem fio com radiofrequência no país de uso pode ser considerada violação da legislação local.

Wireless devices that conform to IEEE standards 802.11a, 802.11b, 802.11g, 802.11n, 802.16e, and others, are designed for, or certified for use in, specific countries. Certificates of Radio Frequency (RF) Compliance from wireless device manufacturers for wireless devices integrated into Hypertherm products can be found in the "Documents library" at www.hypertherm.com.

The user of Hypertherm products that have integrated wireless devices is responsible for ensuring that each wireless device has been certified for the country of use and configured with the correct selection of frequency and channel for the country of use. Wireless devices that are integrated into Hypertherm products are not allowed to be operated in countries where regulations for wireless device certification have not been satisfied. Any wireless device or antenna modification or deviation from the permissible configuration, markings, power, frequency settings, and other local regulations on radio frequency wireless device for the country of use can be an infringement of national law.

La operación de este equipo está sujetaa las siguientes dos condiciones:

1. Es posible que este equipo o disposiitivo no cause interferencia perjudicial.
2. Este equipo o dispositivo debe aceptar cualquier interferencia, incluyendo la que pueda causar su operación no deseada.

Este equipo ha sido disenado para operar con las antenas que enseguida se enlistan y para una ganancia maxima de antena de 2 dBi.

El uso con este equipo de antenas no incluidas en esta lista o que tengan ganancia mayor que 2 dBi quedan prohibidas. La impedancia requerida de la antena es de 50 ohms.

Especificaciones de LAN inalambrica:

- IEEE 802.11 a/b/g hasta 54 Mbps
- Ancho de canal de 20 y 40 MHz con SGI opcional
- Banda unica de 2,4 GHz

Lista de antenas:

1	3CM	CF-MINI-004	2 dBi	Primario
2	DATA ALLIANCE	A2D2RA	2 dBi	Recambios
3	DATA ALLIANCE	A2D2RAv2	1.75 dBi	Recambios
4	LINX TECHNOLOGIES	ANT-2.4-CW-RAH-RPS	1.6 dBi	Recambios

*** Refer to "Regulatory Information" at www.hypertherm.com/docs for the most recent certificates of Radio Frequency (RF) Compliance for wireless devices integrated into Hypertherm products.**

Wireless devices use radio frequencies that may be regulated, but regulations differ from country to country. Wireless devices that conform to IEEE standards 802.11a, 802.11b, 802.11g, 802.11n, 802.16e, and others, are designed for, or certified for use in, specific countries. Certificates of Radio Frequency (RF) Compliance from wireless device manufacturers for wireless devices integrated into Hypertherm products can be found in the "Documents library" at www.hypertherm.com.

The user of Hypertherm products that have integrated wireless devices is responsible for ensuring that each wireless device has been certified for the country of use and configured with the correct selection of frequency and channel for the country of use. Wireless devices that are integrated into Hypertherm products are not allowed to be operated in countries where regulations for wireless device certification have not been satisfied. Any wireless device or antenna modification or deviation from the permissible configuration, markings, power, frequency settings, and other local regulations on radio frequency wireless device for the country of use can be an infringement of national law.

The Hypertherm XPR Plasma Cutting System family use a Lantronix xPico240 (XPC2403) 2.4 GHz Wi-Fi module with a 2 dBi dipole antenna. The Wi-Fi module complies with FCC Part 15.247 and the module has modular approval from the Federal Communications Commission (FCC)

Operation is subject to the following two conditions:

- This device may not cause harmful interference, and
- This device must accept any interference received, including interference that may cause undesired operation.

FCC Statement for XPR Plasma Cutting Systems

The XPR plasma cutting power sources are exempted from FCC 15.103 (b) for it is used exclusively in an industrial plant. At least 20 cm of separation distance between the external antenna of this equipment and the user's body must be maintained at all times. This equipment must be installed and used per Hypertherm instructions without any modifications to the antenna or transmitter supplied by Hypertherm.

XPR plasma cutting power sources generate, use, and radiate radio frequency energy, that may cause harmful interference. If this equipment does cause interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase separation between the equipment and receiver.
- Connect the equipment to an outlet on a circuit different from which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician
