Subject: End of Production | ArcGlide® Torch Height Control

Hypertherm announces the end of production for **ArcGlide Torch Height Control** (THC) effective **December 31st, 2023**.

Hypertherm is sharing its plan to end ArcGlide THC production more than one year in advance of the last planned production date to allow impacted channel partners the necessary time to develop a transition plan to Sensor THC or an alternate THC solution.

For cost-control purposes, Hypertherm strongly encourages channel partners to consider pre-purchasing an adequate volume of ArcGlide THC units and/or parts to support not only new sales requirements through end of production but also to support replacement and service of units already deployed to the field.

Following end of production Hypertherm will support the ArcGlide THC replacement parts needs of channel partners and customers, per our service commitment. However, as the support period progresses Hypertherm will have limited control over parts costs.
