Subject: End of Production | ArcGlide THC and Sensor PHC

As a reminder, effective December 31, 2023, Hypertherm will end production for ArcGlide® torch height control (THC) and Sensor® plasma torch height control (PHC) products.

Replacement parts will be available in accordance with our service commitment. However, as the support period progresses, Hypertherm will have limited control over parts supplies and cost.

If you haven't already, this is a good time to develop a transition plan to Sensor THC or an alternate THC solution.

Please see the list of parts below where production will end on December 31, 2023.
