

Quote Manager ProNest optional module

About

Quote Manager is a next-generation quoting tool designed for manufacturers and fabricators who demand accuracy, speed, and integration. Built to work seamlessly alongside ProNest, Quote Manager enables sales team members to create, modify, and manage quotes through a simple web interface. At the same time, it maintains full synchronization with ProNest production workflows.

Unlike generic quoting solutions, Quote Manager uses actual nests, and real-world machine data from ProNest, ensuring that every quote maintains accuracy. This vertical integration delivers a true 'quote to cut' solution, supporting both sales and operations with actionable insights and robust reporting.

Quote Manager can help you defend and grow your market share. Rapid, mobile-accessible quoting means you can respond to customers in real time, improving win/loss ratios and driving business growth.

Benefits

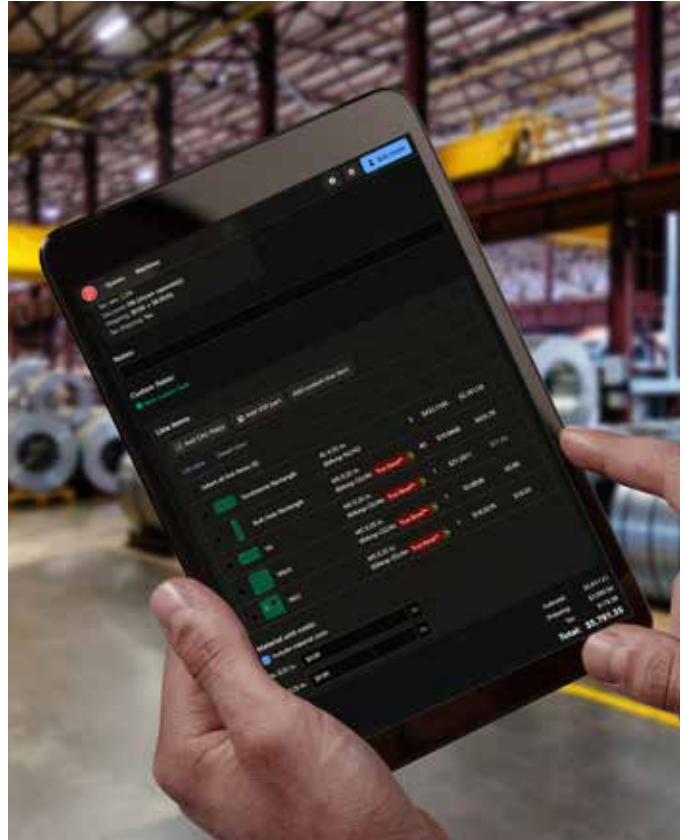

- ProNest quoting extended to the sales team
- Accurate costing based on your real-world nesting and machine data
- Faster turnaround time

Rapid, mobile-accessible quoting means you can respond to customers in real time, improving win/loss ratios and driving business growth.

How it works

Quote Manager is accessible via any web browser on your company's network, supporting desktop, laptop, tablet, and mobile devices. The intuitive, responsive interface allows sales team members to:

- 1. Create Quotes:** Start a new quote or modify existing ones, adding line items from various source files including CAD files, vector PDFs, SVGs, variable shape part library, or custom entries. Multi-select and drag-and-drop file uploads streamline the process.
- 2. Configure Details:** Modify properties for each line item, including part quantities, VSP dimensions, and secondary operations. Exclude or include line items from the quote report as needed, without affecting the underlying job.
- 3. Publish and Sync:** Quotes created in Quote Manager can be instantly shared with customers or converted to production jobs in ProNest, with all relevant part information ready to be nested and cut.

Standard feature highlights

- No Client Installation – all functionality is available via web browser with no software installation required to run the Quote Manager web app
- Mobile connectivity over Wi-Fi for any device on the network
- Offline capability (no internet required for on-premises deployments)
- Responsive design optimized for all device types and operating systems
- Role-based permissions for controlled access
- Machine file publishing pulls in ProNest machine data for accurate costing
- Nesting engine accurately predicts part costing and material usage
- Set and manage quote statuses
- Email completed quotes directly from the web app
- Standard and custom reports available
- Dashboard analytics including win/loss ratios and pending dollar amounts
- Quotes, Quoting Preferences, and the Secondary Operations Library are synchronized between Quote Manager and ProNest
- Advanced search and filtering across multiple criteria
- Integration with Production Manager provides visibility into lead times and job status for sales roles
